

Quick assembly instructions  
for DS / AKU locator

**DS locate**

PASSENGER / DELIVERY CAR

**1.**

Open the hood of the car and find the battery. To mount the locator to the battery, use the wrench that is included in the kit.

**2.**

Wipe the mounting area on the battery with the included disinfectant wipe to clean the place before sticking the locating device.

**3.**

Connect the DS/AKU locator to the battery clamps.

## 4.

Remember to connect red wire to the plus on the car battery.

**5.**

Stick the DS/AKU device to the battery with the double-sided tape on the bottom of the device.

**6.**

Correct installation is confirmed by a green LED.

In order to verify the correctness of the device installation and receiving alerts from e-TOLL system, log in to the **DS Locate** application. You can download it for free from the **Google Play** or **AppStore**.

We have sent the login access data to your e-mail address. If you have not received your access data, please contact us by writing a message to the following address: **pomoc.techniczna@datasystem.pl**.
